

The Berks Business Education Coalition was incorporated in 1992 as a 501c3 non-profit corporation. The mission of the BBEC has remained “to coordinate the resources of the business community, in partnership with the education community, toward selective initiatives which will improve the competencies of students and their aspirations for continuous education.”

The goals of the BBEC are to support member schools in:

- Providing quality Career Development programs
- Improving students’ academic achievement
- Increasing students’ interest in post-secondary education

The BBEC is recognized by the Pennsylvania Department of Community and Economic Development as an Educational Improvement Organization which provides the opportunity for member companies to receive Pennsylvania State Tax Credits for donations they have made to the BBEC.

The BBEC provides numerous opportunities for representatives from education, business and industry and community-based organizations to “get involved.” Business representatives frequently provide career development activities to students facilitated by the BBEC which include participation in career day activities, job shadowing, tours and internships.

Currently over 85 organizations are members of the BBEC. All public and non-public basic and higher education institutions are members of the Coalition. Business membership includes many small, medium, and large employers in Berks County representing most employment sectors including manufacturing, healthcare, and service providers. In addition, many community-based organizations within the County provide support to the Coalition through their membership.

A complete list of the members of the Coalition can be found on the BBEC website at www.berksbec.org or by contacting the Coalition office at 610-372-6114.

Ensure that your organization is in the “loop.” Join the growing number of people who recognize that “an investment in education today, is an investment in the future of Berks County.”

Please join the Berks Business Coalition and become an active supporter of quality education in Berks County.
